

Lesson 9: Changing the Background of a Scene

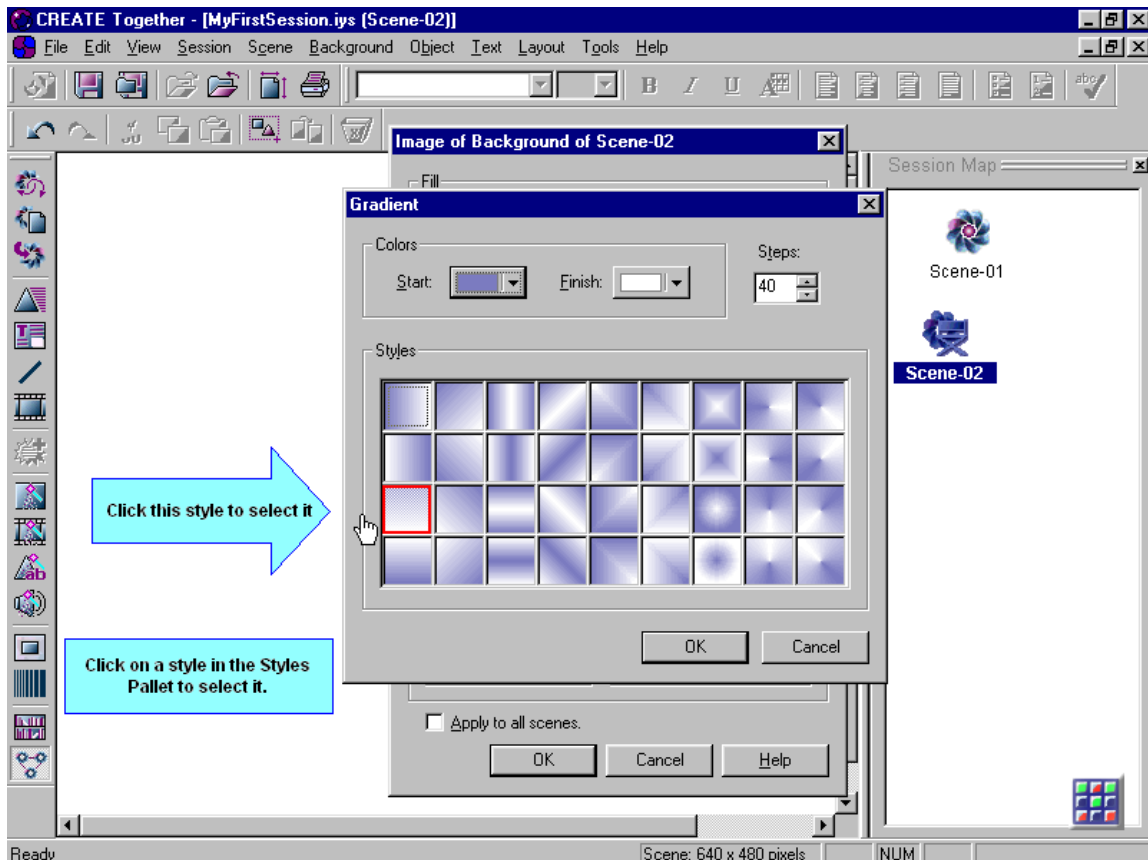

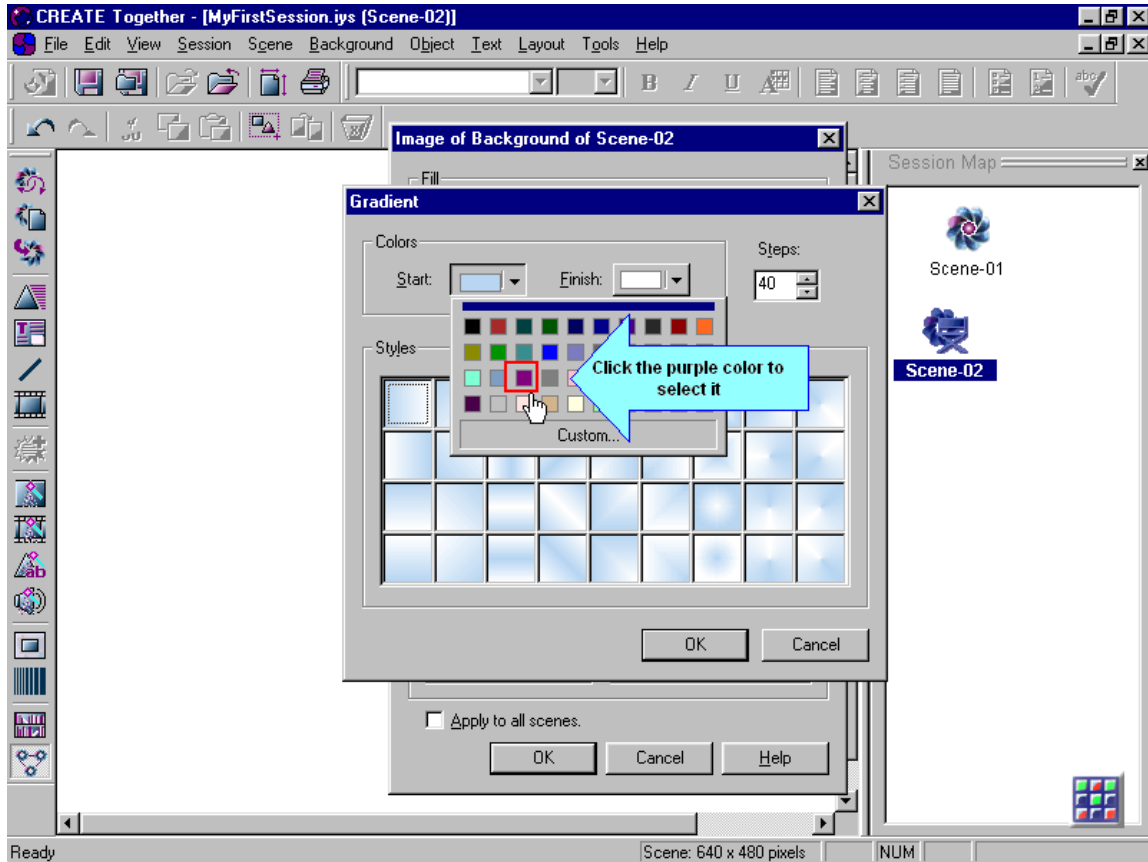

In lesson 2 you selected a background from the library. A background is more than an image. It is an object that can have an image, sounds and actions. Sometimes you may want to change the background's image without changing its other characteristics. This lesson guides you through the process of changing the background's image. In this instance, the background is initially white.

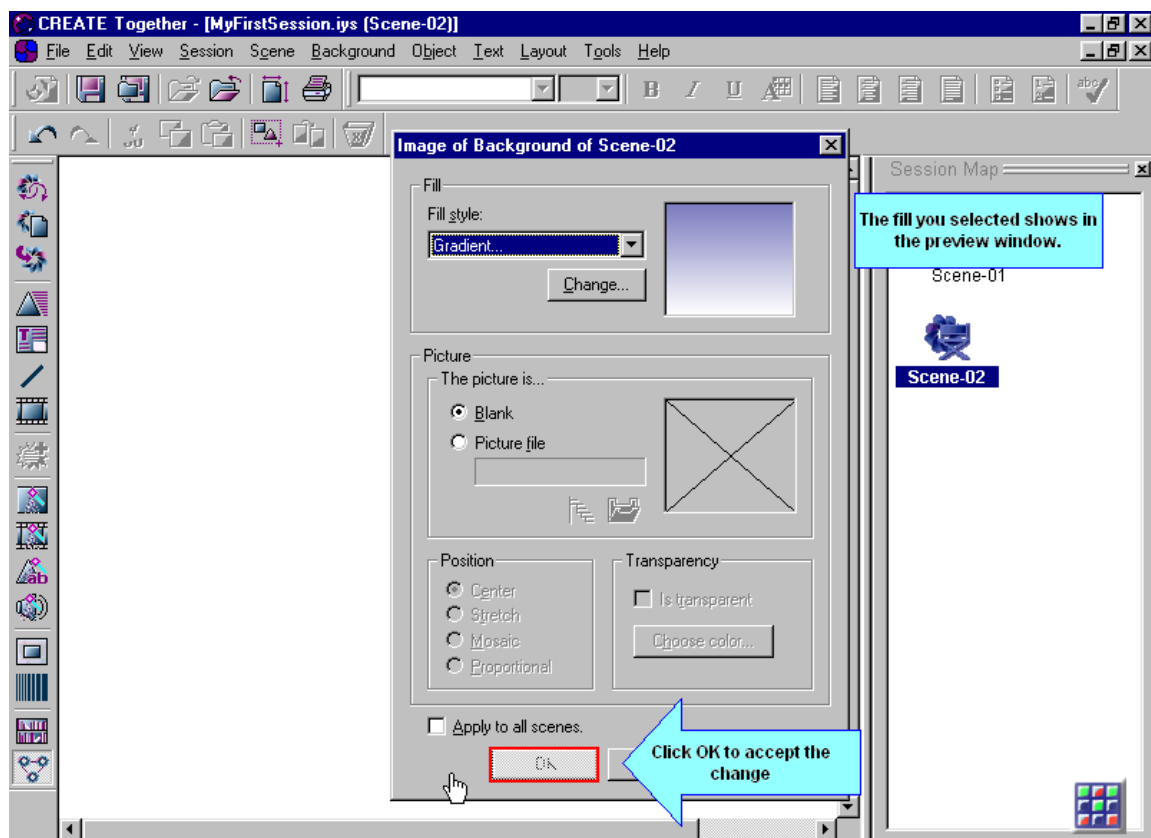

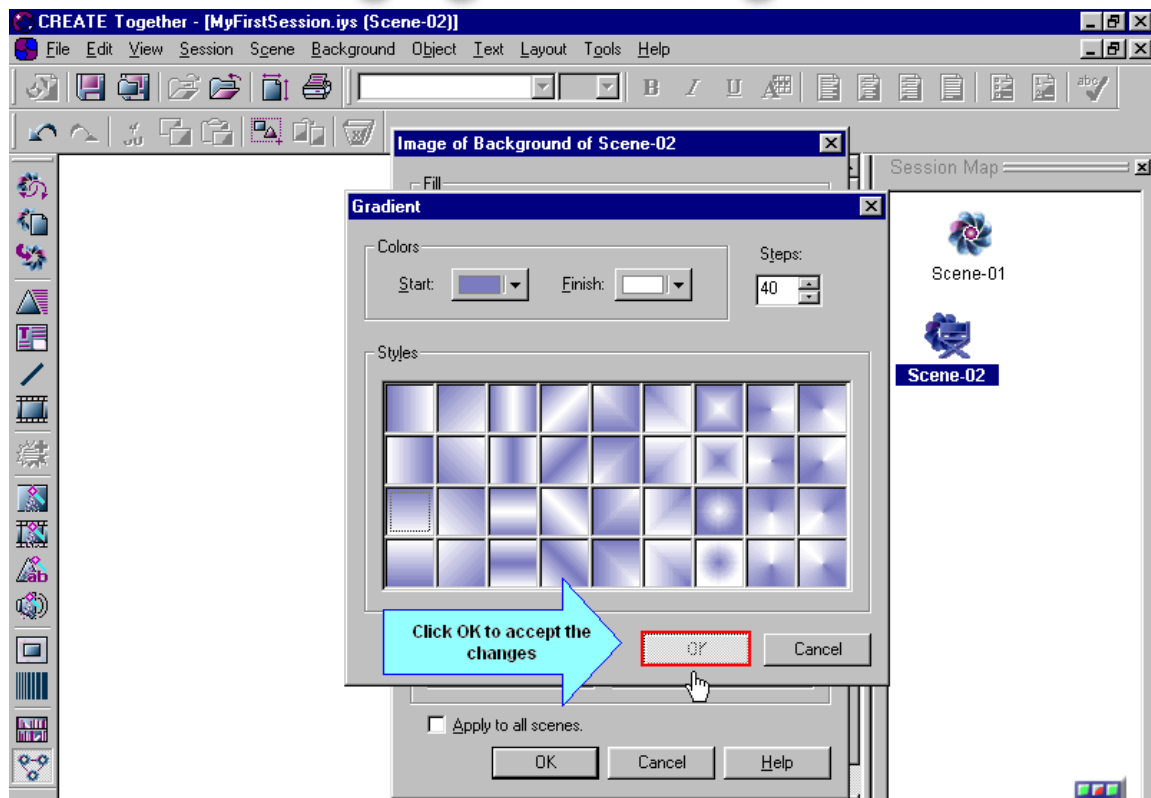

Lesson 9: Changing the Background of a Scene

GREAT!

You have completed Lesson 9: Changing the Background Image of a Scene. Backgrounds can have both a picture and a fill. This allows you to create exciting transition effects.
